

Who We Are

Everybody Needs A Nurse was developed by Diane Halloran, RN, MPH in 2007.

With more than 40 years of experience as a Registered Nurse, Diane has expert knowledge of the health care system. Her listening skills and passion for people have been the hallmarks of her practice.

Diane has worked in a number of outpatient specialty clinics and was a Director of Nursing in a 100-physician group practice in Cleveland, Ohio. Since moving to Chapel Hill in 1989, she has worked at Kaiser Permanente as a Clinical Supervisor and at UNC Hospitals in Urology, Nursing Education and Patient Education.

Diane realizes that patients often need more information and explanation from health care providers. Few patients are able to process the often complex information and ask all their questions within an appointment.

Diane's goal is to help you understand what is said, to let you know what resources are available in your community, and to give you the emotional support you and your family need to make the best health care decisions possible for your journey ahead.

“Over the 40-plus years that I have been a registered nurse, I have given advice and support to many friends and family members during times of illness. Everybody Needs A Nurse is a natural outcome of those experiences.

I want to provide the client and their loved ones with the health information and emotional support needed to make the best decisions possible for themselves regarding their health and to give them the tools that will help them get through the health care system safely.”
