

We want to help

At Everybody Needs A Nurse, our goal is to provide advice and guidance to anyone who can benefit from the experience of a registered nurse. Some of our clients might be people who:

-live far away from your older parents and can't always bring them to the doctor.

-have a complex medical history and need help managing your doctors and medications.

-have a recent diagnosis and are trying to determine the best path of care.

-have a sick child and need advocacy and support.

-want to learn what your medications do and how best to take them.
